

Human anti-HAV IgG (anti-Hepatitis A antibody IgG) ELISA Kit | HAV elisa kit

Human anti-HAV IgG (anti-Hepatitis A antibody IgG) ELISA Kit

CATALOG #
AAA277347

REACTIVITY
Human

PRODUCT SYNONYMS

anti-HAV IgG (anti-Hepatitis A antibody IgG); Human anti-HAV IgG (anti-Hepatitis A antibody IgG) ELISA Kit; Hepatitis A virus IgG; HAV elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human anti-HAV. No significant cross-reactivity or interference between Human anti-HAV and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.061 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for HAV elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to anti-HAV. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to anti-HAV. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain anti-HAV, biotin-conjugated antibody and enzymeconjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of anti-HAV in the samples is then determined by comparing the OD of the samples to the standard curve.
