

Mouse LIPH (Lipase H) ELISA Kit | LIPH elisa kit

Mouse LIPH (Lipase H) ELISA Kit

CATALOG #
AAA277527

REACTIVITY
Mouse

PRODUCT SYNONYMS

LIPH (Lipase H); Mouse LIPH (Lipase H) ELISA Kit; LPDLR; MPAPLA1; PLA1B; mPA-PLA1; LPD lipase-related protein; Phospholipase A1 member B; Membrane-associated phosphatidic acid-selective phospholipase A1-alpha; LIPH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse LIPH. No significant cross-reactivity or interference between Mouse LIPH and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.069 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for LIPH elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to LIPH. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to LIPH. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain LIPH, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of LIPH in the samples is then determined by comparing the OD of the samples to the standard curve.
