

Cattle DSE (Dermatan Sulfate Epimerase) ELISA Kit | DSE elisa kit

Cattle DSE (Dermatan Sulfate Epimerase) ELISA Kit

CATALOG #
AAA277533

REACTIVITY
Cattle

PRODUCT SYNONYMS

DSE (Dermatan Sulfate Epimerase); Cattle DSE (Dermatan Sulfate Epimerase) ELISA Kit; DSEPI; SART2; Squamous Cell Carcinoma Antigen Recognized By T Cells 2; Chondroitin-glucuronate 5-epimerase; DSE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Cattle
Specificity	This assay has high sensitivity and excellent specificity for detection of Cattle DSE. No significant cross-reactivity or interference between Cattle DSE and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.114 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for DSE elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to DSE. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to DSE. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain DSE, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of DSE in the samples is then determined by comparing the OD of the samples to the standard curve.
