

Rat MuRF1 (muscle-specific RING-finger protein 1) ELISA Kit | MuRF1 elisa kit

Rat MuRF1 (muscle-specific RING-finger protein 1) ELISA Kit

CATALOG #
AAA277548

REACTIVITY
Rat

PRODUCT SYNONYMS

MuRF1 (muscle-specific RING-finger protein 1); Rat MuRF1 (muscle-specific RING-finger protein 1) ELISA Kit; MuRF1; IRF; RNF28; SMRZ; TRIM63; IRFMURF2; Iris RING finger protein; MURF1; MuRF-1; muscle specific ring finger protein 2; Muscle-specific RING finger protein 1; RING finger protein 28FLJ32380; RNF28E3 ubiquitin-protein ligase TRIM63; SMRZMURF-1; Striated muscle RING zinc finger protein; tripartite motif containing 63; tripartite motif-containing 63; Tripartite motif-containing protein 63; MuRF1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Rat MuRF1. No significant cross-reactivity or interference between Rat MuRF1 and analogues was observed.
Assay Type	Sandwich
Detection Range	15.63-1000 pg/mL
Sensitivity	6.9 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)?CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)?CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for MuRF1 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat MuRF1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat MuRF1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat MuRF1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Rat MuRF1 in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
