

Zebrafish PG (Progesterone) ELISA Kit | PG elisa kit

Zebrafish PG (Progesterone) ELISA Kit

CATALOG #
AAA277550

REACTIVITY
Zebrafish

PRODUCT SYNONYMS

PG (Progesterone); Zebrafish PG (Progesterone) ELISA Kit; P4; Pregn-4-Ene-3; 20-Dione; PG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Zebrafish
Specificity	This assay has high sensitivity and excellent specificity for detection of Zebrafish PG. No significant cross-reactivity or interference between Zebrafish PG and analogues was observed.
Assay Type	Competitive
Detection Range	1.57-100 ng/mL
Sensitivity	0.47 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for PG elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Zebrafish PG protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Zebrafish PG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Zebrafish PG in the samples is then determined by comparing the OD of the samples to the standard curve.
