

## Mouse HMGR (3-Hydroxy-3-Methylglutaryl-CoA Reductase) ELISA Kit | HMGR elisa kit

Mouse HMGR (3-Hydroxy-3-Methylglutaryl-CoA Reductase) ELISA Kit

CATALOG #  
**AAA277680**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

HMGR (3-Hydroxy-3-Methylglutaryl-CoA Reductase); Mouse HMGR (3-Hydroxy-3-Methylglutaryl-CoA Reductase) ELISA Kit; HMG-CoA Reductase; Hydroxymethylglutaryl-CoA Reductase; HMDH; HMGR elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                       |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Mouse                                                                                                                                                                                 |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Mouse HMGR. No significant cross-reactivity or interference between Mouse HMGR and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                              |
| Detection Range       | 0.32-20 ng/mL                                                                                                                                                                         |
| Sensitivity           | 0.12 ng/mL                                                                                                                                                                            |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.                |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.               |

### ADDITIONAL INFORMATION

#### Related Product Information for HMGR elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse HMGR. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse HMGR. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse HMGR, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Mouse HMGR in the samples is then determined by comparing the OD of the samples to the standard curve.
