

## Human SPN (Sialophorin) ELISA Kit | SPN elisa kit

Human SPN (Sialophorin) ELISA Kit

CATALOG #  
AAA277843

REACTIVITY  
Human

### PRODUCT SYNONYMS

SPN (Sialophorin); Human SPN (Sialophorin) ELISA Kit; GALGP; GPL115; LSN; CD43; SPN elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                     |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Human                                                                                                                                                                               |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Human SPN. No significant cross-reactivity or interference between Human SPN and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                            |
| Detection Range       | 0.16-10 ng/mL                                                                                                                                                                       |
| Sensitivity           | 0.071 ng/mL                                                                                                                                                                         |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.              |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.             |

### ADDITIONAL INFORMATION

#### Related Product Information for SPN elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human SPN. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human SPN. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human SPN, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Human SPN in the samples is then determined by comparing the OD of the samples to the standard curve.
