

## Cattle CXCL6 (Chemokine C-X-C-Motif Ligand 6) ELISA Kit | CXCL6 elisa kit

Cattle CXCL6 (Chemokine C-X-C-Motif Ligand 6) ELISA Kit

CATALOG #  
**AAA277949**

REACTIVITY  
**Cattle**

### PRODUCT SYNONYMS

CXCL6 (Chemokine C-X-C-Motif Ligand 6); Cattle CXCL6 (Chemokine C-X-C-Motif Ligand 6) ELISA Kit; CXCL6; SCYB6; GCP2; CKA-3; Chemokine (C-X-C-Motif)ligand 6; Small Inducible Cytokine Subfamily B (Cys-X-Cys)Member 6; Chemokine alpha 3; Small-inducible cytokine B6; CXCL6 elisa kit

### PRODUCT SPECIFICATIONS

|                       |                                                                                                                                                                                           |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity            | Cattle                                                                                                                                                                                    |
| Specificity           | This assay has high sensitivity and excellent specificity for detection of Cattle CXCL6. No significant cross-reactivity or interference between Cattle CXCL6 and analogues was observed. |
| Assay Type            | Sandwich                                                                                                                                                                                  |
| Detection Range       | 15.63-1000 pg/mL                                                                                                                                                                          |
| Sensitivity           | 6.47 pg/mL                                                                                                                                                                                |
| Intra-assay Precision | Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.                    |
| Inter-assay Precision | Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |

### ADDITIONAL INFORMATION

#### Related Product Information for CXCL6 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Cattle CXCL6. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cattle CXCL6. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Cattle CXCL6, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Cattle CXCL6 in the samples is then determined by comparing the OD of the samples to the standard curve.
