

Human uPA (Plasminogen Activator, Urokinase) ELISA Kit | uPA elisa kit

Human uPA (Plasminogen Activator, Urokinase) ELISA Kit

CATALOG #
AAA278063

REACTIVITY
Human

PRODUCT SYNONYMS

uPA (Plasminogen Activator; Urokinase); Human uPA (Plasminogen Activator; Urokinase) ELISA Kit; PLAU; ATF; URK; UK; UP-A; Abbokinase; Urokinase-Type Plasminogen Activator; uPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich
Samples	plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Detection Range	0.16-10ng/mL
Sensitivity	0.067ng/mL

ADDITIONAL INFORMATION

Related Product Information for uPA elisa kit

Test Principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human uPA. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human uPA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human uPA, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Human uPA in the samples is then determined by comparing the OD of the samples to the standard curve.
