

Rat FG (Fibrinogen) ELISA Kit | FG elisa kit

Rat FG (Fibrinogen) ELISA Kit

CATALOG #
AAA278110

REACTIVITY
Rat

PRODUCT SYNONYMS

FG (Fibrinogen); Rat FG (Fibrinogen) ELISA Kit; F1; FI; Fbg; Coagulation Factor I; FG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Assay Type	Sandwich
Samples	plasma
Detection Range	1.57-100ug/mL
Sensitivity	0.49ug/mL

ADDITIONAL INFORMATION

Related Product Information for FG elisa kit

Test Principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Rat FG. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rat FG. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Rat FG, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Rat FG in the samples is then determined by comparing the OD of the samples to the standard curve.
