

Human Irisin ELISA Kit | Irisin elisa kit

Human Irisin ELISA Kit

CATALOG #
AAA278600

REACTIVITY
Human

PRODUCT SYNONYMS

Irisin; Human Irisin ELISA Kit; FRCP2; Fibronectin type III repeat-containing protein 2; FNDC5; Fibronectin Type III Domain Containing Protein 5; Irisin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Assay Type	Sandwich
Samples	serum, plasma, tissue homogenates and other biological fluids
Detection Range	0.32-20ng/mL
Sensitivity	0.11ng/mL

ADDITIONAL INFORMATION

Related Product Information for Irisin elisa kit

Test Principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Human Irisin. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human Irisin. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Human Irisin, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Human Irisin in the samples is then determined by comparing the OD of the samples to the standard curve.
