

Rabbit FPA (Fibrinopeptide A) ELISA Kit | FPA elisa kit

Rabbit FPA (Fibrinopeptide A) ELISA Kit

CATALOG #
AAA278846

REACTIVITY
Rabbit

PRODUCT SYNONYMS

FPA (Fibrinopeptide A); Rabbit FPA (Fibrinopeptide A) ELISA Kit; FP-A; FPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Assay Type	Competitive Inhibition
Samples	Plasma.
Detection Range	1.57-100ng/mL
Sensitivity	0.48ng/mL

ADDITIONAL INFORMATION

Related Product Information for FPA elisa kit

Test Principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Rabbit FPA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Rabbit FPA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm +/- 10nm. The concentration of Rabbit FPA in the samples is then determined by comparing the OD of the samples to the standard curve.
