

## Ba71V-126 Antibody Pair Kit

Ba71V-126 Antibody Pair

|                               |                      |                                                |                              |
|-------------------------------|----------------------|------------------------------------------------|------------------------------|
| CATALOG #<br><b>AAA278944</b> | HOST<br><b>Mouse</b> | REACTIVITY<br><b>African swine fever virus</b> | APPLICATIONS<br><b>ELISA</b> |
|-------------------------------|----------------------|------------------------------------------------|------------------------------|

### PRODUCT SYNONYMS

Ba71V-126; Monoclonal Antibody Pair Kit; Ba71V-126 Antibody Pair; Envelope protein p54; E183L; Ba71V-126 antibody pair kit

### PRODUCT SPECIFICATIONS

|                                                         |                                 |
|---------------------------------------------------------|---------------------------------|
| Host                                                    | Mouse                           |
| Reactivity                                              | African swine fever virus       |
| Clonality                                               | Monoclonal                      |
| Clone Number                                            | IgG                             |
| Form/Format                                             | Liquid                          |
| Immunogen                                               | African swine fever virus       |
| Applicable Applications for Ba71V-126 antibody pair kit | ELISA (Sandwich ELISA)          |
| Storage Buffer                                          | 50% Glycerol, 0.01M PBS, PH 7.4 |

### NCBI AND UNIPROT INFORMATION

|                     |                        |
|---------------------|------------------------|
| UniProt Accession # | <a href="#">Q65194</a> |
|---------------------|------------------------|

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
