

Human CORT (Cortistatin) ELISA Kit | CORT elisa kit

Human CORT (Cortistatin) ELISA Kit

CATALOG #
AAA28002

REACTIVITY
Human

PRODUCT SYNONYMS

CORT (Cortistatin); Human CORT (Cortistatin) ELISA Kit; CST14; CST17; CST29; CORT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human CORT. No significant cross-reactivity or interference between Human CORT and analogues was observed.
Assay Type	Competitive
Detection Range	281.25-18000 pg/mL
Sensitivity	86.7 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for CORT elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Human CORT protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Human CORT. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Human CORT in the samples is then determined by comparing the OD of the samples to the standard curve..
