

Cattle ALD (Aldosterone) ELISA Kit | ALD elisa kit

Cattle ALD (Aldosterone) ELISA Kit

CATALOG #
AAA28052

REACTIVITY
Cattle

PRODUCT SYNONYMS

ALD (Aldosterone); Cattle ALD (Aldosterone) ELISA Kit; ALD; ALD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Cattle
Specificity	This assay has high sensitivity and excellent specificity for detection of Cattle ALD. No significant cross-reactivity or interference between Cattle ALD and analogues was observed.
Assay Type	Competitive
Detection Range	31.25-2000 pg/mL
Sensitivity	9.41 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for ALD elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with D-Dimer(D2D) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to D-Dimer(D2D). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of DDimer(D2D) in the samples is then determined by comparing the OD of the samples to the standard curve.
