

# Rabbit anti-Human, Mouse Phospho-RPS6-S240/244 Antibody | anti-RPS6-S240/244 antibody

Phospho-RPS6-S240/244 Polyclonal Antibody

| CATALOG # | HOST   | REACTIVITY   | APPLICATIONS |
|-----------|--------|--------------|--------------|
| AAA280631 | Rabbit | Human, Mouse | Western Blot |

## PRODUCT SYNONYMS

Phospho-RPS6-S240/244; Phospho-RPS6-S240/244 Polyclonal Antibody; S6; anti-RPS6-S240/244 antibody

## PRODUCT SPECIFICATIONS

|                                                         |                                                                                         |
|---------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Host                                                    | Rabbit                                                                                  |
| Reactivity                                              | Human, Mouse                                                                            |
| Isotype                                                 | IgG                                                                                     |
| Purity/Purification                                     | Affinity purification                                                                   |
| Sequence Length                                         | 249                                                                                     |
| Applicable Applications for anti-RPS6-S240/244 antibody | WB (Western Blot)                                                                       |
| Immunogen                                               | A phospho specific peptide corresponding to residues surrounding S240/244 of human RPS6 |
| Preparation and Storage                                 | Store at -20 degree C. Avoid freeze / thaw cycles.                                      |

## IMAGES

### IP (Immunoprecipitation)

Immunoprecipitation analysis of 200ug extracts of 293 cells treated by PMA using 2.5ug Phospho-RPS6KB1-S240/244 antibody. Western blot was performed from the immunoprecipitate using Phospho-RPS6KB1-S240/244 antibody at a dilution of 1:1000.

### WB (Western Blot)

Western blot analysis of extracts of HeLa and 293T cells, using Phospho-RPS6KB1-S240/244 antibody at 1:1000 dilution. HeLa cells were treated by EGF (100ng/ml) for 30 minutes after serum-starvation overnight. 293T cells were treated by PMA/TPA (200nM) for 30 minutes after serum-starvation overnight. Secondary antibody: HRP Goat Anti-Rabbit IgG (H+L) at 1:10000 dilution. Lysates/proteins: 25ug per lane. Blocking buffer: 3% BSA.

ADDITIONAL INFORMATION

|                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Related Product Information for anti-RPS6-S240/244 antibody | Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a cytoplasmic ribosomal protein that is a component of the 40S subunit. The protein belongs to the S6E family of ribosomal proteins. It is the major substrate of protein kinases in the ribosome, with subsets of five C-terminal serine residues phosphorylated by different protein kinases. Phosphorylation is induced by a wide range of stimuli, including growth factors, tumor-promoting agents, and mitogens. Dephosphorylation occurs at growth arrest. The protein may contribute to the control of cell growth and proliferation through the selective translation of particular classes of mRNA. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. |
| Product Categories/Family for anti-RPS6-S240/244 antibody   | Phosphorylated                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
