ADDITIONAL INFORMATION

Related Product Information for IFNL2 elisa kit	Product Overview: The ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of samples in cell culture supernatant, serum, plasma (EDTA, citrate, heparin). Intended Use: This Human IL-28A/IFN-lambda 2 ELISA kit is intended for laboratory research use only. The stop solution changes color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human IL-28A/IFN-lambda 2 in the sample, this Human IL-28A/IFN-lambda 2 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of optical density versus Human IL-28A/IFN-lambda 2 concentration. The concentration of the samples is then determined by comparing the O.D. of the samples to the standard curve.
