

## Human IL-17 ELISA Kit | IL-17 elisa kit

Human IL-17 ELISA Kit

CATALOG #  
**AAA281408**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

IL-17; Human IL-17 ELISA Kit; IL-17 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Human                                                            |
| Assay Type              | Sandwich ELISA                                                   |
| Samples                 | Cell Culture Supernatant, Serum, Plasma (EDTA, Citrate, Heparin) |
| Detection Range         | 31.25-2000 ng/mL                                                 |
| Sensitivity             | 7 pg/mL                                                          |
| Detection               | Colorimetric                                                     |
| Conjugate               | HRP                                                              |
| Preparation and Storage | Store at 4 degree C.                                             |

### ADDITIONAL INFORMATION

#### Related Product Information for IL-17 elisa kit

**Product Overview:** The ELISA (Enzyme-Linked Immunosorbent Assay) kit is an in vitro enzyme-linked immunosorbent assay for the quantitative measurement of samples in cell culture supernatant, serum, plasma (EDTA, citrate, heparin).

**Intended Use:** This Human IL-17 ELISA kit is intended for laboratory research use only. The stop solution changes color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Human IL-17 in the sample, this Human IL-17 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of optical density versus Human IL-17 concentration. The concentration of the samples is then determined by comparing the O.D. of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

|             |      |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
