

General Testosterone (Testo) ELISA Kit | Testo elisa kit

General Testosterone ELISA Kit (Testo)

CATALOG #
AAA281412

REACTIVITY
General

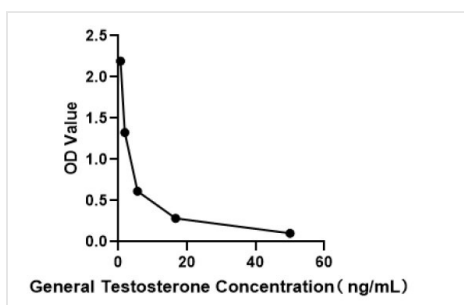

PRODUCT SYNONYMS

Testosterone (Testo); General Testosterone ELISA Kit (Testo); Testo elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of Testosterone. No significant cross-reactivity or interference between Testosterone and analogues was observed.
Assay Type	Quantitative Competitive
Detection Range	0.61-50ng/mL
Sensitivity	< 0.19ng/mL
Intra-assay Precision	Intra-plate Precision 3 samples with low, middle and high level Testosterone were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-plate Precision 3 samples with low, middle and high level Testosterone were tested on 3 different plates, 20 replicates in each plate. Inter-Assay: CV<15%
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for Testo elisa kit

Background: This ELISA kit used for quantitative determination of Testosterone in serum, plasma, cell culture supernatants and other biological fluids. For research use only, and it is highly recommended to read thoroughly of this manual before using the product.

Principle of the Assay: This assay is based on the competitive binding technique in which Testosterone present in a sample competes with a fixed amount of horseradish peroxidase (HRP)-labeled Testosterone for sites on a mouse monoclonal antibody. Following a wash to remove excess conjugate and unbound sample, a chromogenic substrate solution is added to the wells to determine the bound enzyme activity. The color development is stopped by acid, and the absorbance is read at 450 nm. The intensity of the color is inversely proportional to the concentration of Cortisol in the sample.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
