IMAGES

IHC (Immunohistochemistry)

Annexin V Antibody (C-term) IHC analysis in formalin fixed and paraffin embedded human hepatocarcinoma followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the Annexin V Antibody (C-term) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)

Western blot analysis of Annexin V antibody (C-term) in SK-Br-3 cell line lysates (35ug/lane). Annexin V (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-ANXA5 antibody	Annexin 5 belongs to the annexin family of calcium-dependent phospholipid binding proteins some of which have been implicated in membrane-related events along exocytotic and endocytotic pathways. Annexin 5 is a phospholipase A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. Annexin 5 has also been described as placental anticoagulant protein I, vascular anticoagulant-alpha, endonexin II, lipocortin V, placental protein 4 and anchorin CII.
