ISL1 Antibody (Center) western blot analysis in mouse bladder tissue lysates (35ug/lane). This demonstrates the ISL1 antibody detected the ISL1 protein (arrow).

WB (Western Blot)
ISL1 Antibody (Center) western blot analysis in MDA-MB231 cell line lysates (35ug/lane). This demonstrates the ISL1 antibody detected the ISL1 protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-ISL1 antibody	ISL1 is a member of the LIM/homeodomain family of transcription factors. The encoded protein binds to the enhancer region of the insulin gene, among others, and may play an important role in regulating insulin gene expression. The encoded protein is central to the development of pancreatic cell lineages and may also be required for motor neuron generation. Mutations in this gene have been associated with maturity-onset diabetes of the young.
