IMAGES

IHC (Immunohiostchemistry)
Formalin-fixed and paraffin-embedded human lymph with XPOT Antibody (N-term), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

WB (Western Blot)
Western blot analysis of XPOT antibody (N-term) in Ramos cell line lysates (35ug/lane). XPOT (arrow) was detected using the purified Pab.

ADDITIONAL INFORMATION

Related Product Information for anti-XPOT antibody	XPOT is a protein belonging to the RAN-GTPase exportin family that mediates export of tRNA from the nucleus to the cytoplasm. Translocation of tRNA to the cytoplasm occurs once exportin has bound both tRNA and GTP-bound RAN.
