IMAGES

IHC (Immunohistochemistry)

PTN Antibody (N-term) immunohistochemistry analysis in formalin fixed and paraffin embedded human brain tissue followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of PTN Antibody (N-term) for immunohistochemistry. Clinical relevance has not been evaluated.

WB (Western Blot)

PTN Antibody (N-term) western blot analysis in mouse NIH-3T3 cell line lysates (35ug/lane). This demonstrates the PTN antibody detected the PTN protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-PTN antibody	Pleiotrophin or Neurite Growth-promoting Factor 1 (NEGF1), also called Heparin Affin Regulatory Peptide (HARP) or Heparin Binding Growth associated molecule (HB-GAM) is an 18-kDa growth factor that has a high affinity for heparin. It is structurally related to midkine and retinoic acid induced heparin-binding protein.
