IMAGES

IHC (Immunohistochemistry)

Formalin-fixed and paraffin-embedded human prostata carcinoma tissue reacted with CAMK1G (Center K226) , which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

WB (Western Blot)

Western blot analysis of CAMK1G (arrow) using rabbit polyclonal CAMK1G (Center K226) Antibody. 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected with CAMK1G gene (Lane 2) (Origene Technologies).

WB (Western Blot)

CAMK1G Antibody (Center K226) western blot analysis in HL-60,K562 cell line and mouse cerebellum tissue lysates (35ug/lane).This demonstrates the CAMK1G antibody detected the CAMK1G protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-CAMK1G antibody	Ca2+/calmodulin-dependent protein kinase I (CaMKI) constitutes a family of closely related isoforms (alpha, beta and gamma). CLICK-III/CaMKIgamma is a novel membrane-anchored neuronal Ca2+/calmodulin-dependent protein kinase. AMKIgamma is abundant in neurons, particularly in the amygdala and ventromedial hypothalamus. Like the other CaMKI isoforms, full activation of CLICK-III/CaMKIgamma requires both Ca(2+)/CaM and phosphorylation by CaMKK.
