| Host                                            | Rabbit                                                                                                                                                                                    |
| Reactivity                                      | Human                                                                                                                                                                                     |
| Clonality                                       | Polyclonal                                                                                                                                                                                |
| Isotype                                         | Rabbit Ig                                                                                                                                                                                 |
| Specificity                                     | This APOL1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 137-171 amino acids from human APOL1.                                             |
| Purity/Purification                             | Purified Rabbit Polyclonal Antibody (Pab)                                                                                                                                                 |
| Form/Format                                     | Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS. |
| Sequence Positions                              | 137-171                                                                                                                                                                                   |
| Applicable Applications for anti-APOL1 antibody | WB (Western Blot), FCM/FACS (Flow Cytometry), IHC (Immunohistochemistry), ELISA                                                                                                           |
| Function                                        | May play a role in lipid exchange and transport throughout the body. May participate in reverse cholesterol transport from peripheral cells to the liver.                                 |
| Cellular Location                               | Secreted.                                                                                                                                                                                 |
| Tissue Location                                 | Plasma. Found on APOA-I-containing high density lipoprotein (HDL3). Expressed in pancreas, lung, prostate, liver, placenta and spleen.                                                    |
| Preparation and Storage                         | Maintain refrigerated at 2-8 degree C for up to 2 weeks. For long term storage store at -20 degree C in small aliquots to prevent freeze-thaw cycles.                                     |

**FCM/FACS (Flow Cytometry)**  
APOL1 Antibody (19169) FC analysis of MCF-7 cells (bottom histogram) compared to a negative control cell (top histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

**IHC (Immunohistochemistry)**  
APOL1 Antibody (AAA288167) IHC analysis in formalin fixed and paraffin embedded human breast carcinoma followed by peroxidase conjugation of the secondary antibody and DAB staining. This data demonstrates the use of the APOL1 Antibody for immunohistochemistry. Clinical relevance has not been evaluated.

**WB (Western Blot)**  
APOL1-BH3 Domain Antibody (AAA288167) western blot analysis in U937 cell line lysates (35ug/lane). This demonstrates the APOL1-BH3 Domain antibody detected the APOL1-BH3 Domain protein (arrow).

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Related Product Information for anti-APOL1 antibody | APOL1 is a secreted high density lipoprotein which binds to apolipoprotein A-I. Apolipoprotein A-I is a relatively abundant plasma protein and is the major apoprotein of HDL. It is involved in the formation of most cholesteryl esters in plasma and also promotes efflux of cholesterol from cells. This apolipoprotein L family member may play a role in lipid exchange and transport throughout the body, as well as in reverse cholesterol transport from peripheral cells to the liver. |
