FCM/FACS (Flow Cytometry)
KLF14 Antibody (C-term) flow cytometric analysis of Jurkat cells (right histogram) compared to a negative control cell (left histogram).FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

WB (Western Blot)
KLF14 Antibody (C-term) western blot analysis in mouse kidney tissue lysates (35ug/lane).This demonstrates the KLF14 antibody detected the KLF14 protein (arrow).

ADDITIONAL INFORMATION

Related Product Information for anti-KLF14 antibody	This gene encodes a member of the Kruppel-like family of transcription factors. The gene exhibits imprinted expression from the maternal allele in embryonic and extra-embryonic tissues. Expression of this gene is induced by TGF-beta, and the protein represses TGF-beta receptor II expression. The protein functions as part of a transcriptional co-repressor complex that also contains the transcriptional regulator SIN3A and histone deacetylase 2.
