ADDITIONAL INFORMATION

Related Product Information for anti-ANXA1 antibody

Plays important roles in the innate immune response as effector of glucocorticoid-mediated responses and regulator of the inflammatory process. Has anti-inflammatory activity (PubMed:25664854). Promotes chemotaxis of granulocytes and monocytes via activation of the formyl peptide receptors (PubMed:8557678). Plays a role in the formation of phagocytic cups and phagosomes. Plays a role in phagocytosis by mediating the Ca (2+)-dependent interaction between phagosomes and the actin cytoskeleton (By similarity).
