

## Rabbit anti-Human, Mouse PLIN2 Polyclonal Antibody | anti-PLIN2 antibody

PLIN2 Antibody

| CATALOG # | HOST   | REACTIVITY   | APPLICATIONS                       |
|-----------|--------|--------------|------------------------------------|
| AAA301112 | Rabbit | Human, Mouse | Immunohistochemistry, Western Blot |

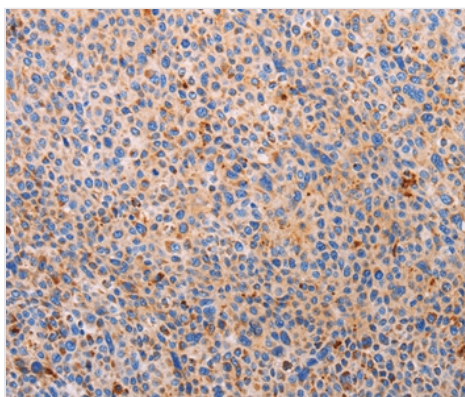

### PRODUCT SYNONYMS

PLIN2; Polyclonal Antibody; PLIN2 Antibody; ADFP; ADRP; anti-PLIN2 antibody

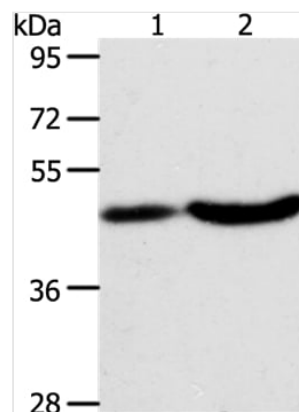

### PRODUCT SPECIFICATIONS

|                                                 |                                                                                      |
|-------------------------------------------------|--------------------------------------------------------------------------------------|
| Host                                            | Rabbit                                                                               |
| Reactivity                                      | Human, Mouse                                                                         |
| Clonality                                       | Polyclonal                                                                           |
| Specificity                                     | The antibody detects endogenous levels of total PLIN2 protein.                       |
| Purity/Purification                             | Antigen affinity purification.                                                       |
| Form/Format                                     | Rabbit IgG in pH7.3 PBS, 0.05% NaN <sub>3</sub> , 50% Glycerol.                      |
| Concentration                                   | 0.8 mg/ml (varies by lot)                                                            |
| Sequence Length                                 | 437                                                                                  |
| Applicable Applications for anti-PLIN2 antibody | IHC (Immunohistochemistry), WB (Western Blot)                                        |
| Immunogen Type                                  | Peptide                                                                              |
| Immunogen Description                           | Synthetic peptide corresponding to residues near the C terminal of human Perilipin 2 |
| Target Name                                     | PLIN2                                                                                |
| Preparation and Storage                         | Store at -20 degree C                                                                |

### IMAGES

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human liver cancer tissue using at dilution 1/20.

**Application Data**

Gel: 10%SDS-PAGE Lysates (from left to right): Human liver cancer and mouse brain tissue  
Amount of lysate: 40ug per lane Primary antibody: 1/200 dilution Secondary antibody dilution: 1/8000 Exposure time: 40 seconds

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Related Product Information for anti-PLIN2 antibody | The protein encoded by this gene belongs to the perilipin family, members of which coat intracellular lipid storage droplets. This protein is associated with the lipid globule surface membrane material, and maybe involved in development and maintenance of adipose tissue. However, it is not restricted to adipocytes as previously thought, but is found in a wide range of cultured cell lines, including fibroblasts, endothelial and epithelial cells, and tissues, such as lactating mammary gland, adrenal cortex, Sertoli and Leydig cells, and hepatocytes in alcoholic liver cirrhosis, suggesting that it may serve as a marker of lipid accumulation in diverse cell types and diseases. Alternatively spliced transcript variants have been found for this gene. |
| Product Categories/Family for anti-PLIN2 antibody   | Total protein Ab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
