

# Rabbit anti-Human TRADD Polyclonal Antibody | anti-TRADD antibody

TRADD antibody

| CATALOG # | HOST   | REACTIVITY | APPLICATIONS                                           |
|-----------|--------|------------|--------------------------------------------------------|
| AAA304361 | Rabbit | Human      | Immunofluorescence, Immunohistochemistry, Western Blot |

## PRODUCT SYNONYMS

TRADD; Polyclonal Antibody; TRADD antibody; anti-TRADD antibody

## PRODUCT SPECIFICATIONS

|                                                 |                                                                                                         |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Host                                            | Rabbit                                                                                                  |
| Reactivity                                      | Human                                                                                                   |
| Clonality                                       | Polyclonal                                                                                              |
| Purity/Purification                             | Purified by antigen-affinity chromatography.                                                            |
| Form/Format                                     | Supplied in 1XPBS, 10% Glycerol (pH7.0). 0.01% Thimerosal was added as a preservative.                  |
| Sequence Length                                 | 312                                                                                                     |
| Applicable Applications for anti-TRADD antibody | IF (Immunofluorescence), IHC (Immunohistochemistry), WB (Western Blot)                                  |
| Immunogen Type                                  | Peptide                                                                                                 |
| Immunogen Description                           | Synthetic peptide contain a sequence corresponding to a region within amino acids 1 and 13 of TRADD     |
| Target Name                                     | TRADD                                                                                                   |
| Preparation and Storage                         | Store at -20 degree C for long term preservation (recommended). Store at 4 degree C for short term use. |

## IMAGES

### IF (Immunofluorescence)

Confocal immunofluorescence analysis (Olympus FV10i) of methanol-fixed HeLa, using TRADD antibody (Green) at 1: 500 dilution and alpha-tubulin antibody (Red) at 1: 2000.

### IHC (Immunohistochemistry)

Immunohistochemical analysis of paraffin-embedded colon ca, using TRADD antibody at 1: 100 dilution.

#### Application Data

Sample (10 ug of whole cell lysate) A: A549 B: SiHa 10% SDS PAGE Primary antibody diluted at 1: 1000

## ADDITIONAL INFORMATION

|                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| <b>Related Product Information for anti-TRADD antibody</b> | The protein encoded by this gene is a death domain containing adaptor molecule that interacts with TNFRSF1A/TNFR1 and mediates programmed cell death signaling and NF-kappaB activation. This protein binds adaptor protein TRAF2, reduces the recruitment of inhibitor-of-apoptosis proteins (IAPs) by TRAF2, and thus suppresses TRAF2 mediated apoptosis. This protein can also interact with receptor TNFRSF6/FAS and adaptor protein FADD/MORT1, and is involved in the Fas-induced cell death pathway. [provided by RefSeq] |
| <b>Product Categories/Family for anti-TRADD antibody</b>   | Total protein Ab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
