IMAGES

IHC (Immunohistochemistry)
Immunohistochemical analysis of paraffin-embedded human breast carcinoma tissue using Synaptotagmin (phospho-Thr202) antibody (left) or the same antibody preincubated with blocking peptide (right).

WB (Western Blot)
Western blot analysis of extracts from colo cells (Lane 2), using Synaptotagmin (Phospho-Thr202) Antibody. The lane on the left is treated with antigen-specific peptide.

ADDITIONAL INFORMATION

Related Product Information for anti-SYT1 antibody	The synaptotagmins are integral membrane proteins of synaptic vesicles thought to serve as Ca(2+) sensors in the process of vesicular trafficking and exocytosis. Calcium binding to synaptotagmin I participates in triggering neurotransmitter release at the synapse. E Carafoli, Crit. Rev. Biochem. Mol.
