### PRODUCT SYNONYMS

CCL25; Polyclonal Antibody; CCL25 Antibody; TECK; Ckb15; SCYA25; anti-CCL25 antibody

### PRODUCT SPECIFICATIONS

|                                                 |                                                                 |
|-------------------------------------------------|-----------------------------------------------------------------|
| Host                                            | Rabbit                                                          |
| Reactivity                                      | Human                                                           |
| Clonality                                       | Polyclonal                                                      |
| Specificity                                     | The antibody detects endogenous levels of total CCL25 protein.  |
| Purity/Purification                             | Antigen Affinity Purification                                   |
| Form/Format                                     | Rabbit IgG in pH7.4 PBS, 0.05% NaN <sub>3</sub> , 40% Glycerol. |
| Concentration                                   | 1.2 mg/ml (varies by lot)                                       |
| Sequence Length                                 | 149                                                             |
| Applicable Applications for anti-CCL25 antibody | IHC (Immunohistochemistry)                                      |
| Immunogen                                       | Fusion protein of human CCL25                                   |
| Immunogen Type                                  | Protein                                                         |
| Preparation and Storage                         | Store at -20 degree C                                           |

### IMAGES

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human breast cancer tissue using at dilution 1/20.

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human thyroid cancer tissue using at dilution 1/20.

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Related Product Information for anti-CCL25 antibody | This antimicrobial gene belongs to the subfamily of small cytokine CC genes.Cytokines are a family of secreted proteins involved in immunoregulatory and inflammatory processes.The CC cytokines are proteins characterized by two adjacent cysteines. The cytokine encoded by this gene displays chemotactic activity for dendritic cells, thymocytes, and activated macrophages but is inactive on peripheral blood lymphocytes and neutrophils. The product of this gene binds to chemokine receptor CCR9. Alternative splicing results in multiple transcript variants. |
| Product Categories/Family for anti-CCL25 antibody   | Total protein Ab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
