ADDITIONAL INFORMATION

Related Product Information for anti-P antibody	Non catalytic polymerase cofactor and regulatory protein that plays a role in viral transcription and replication.Stabilizes the RNA polymerase L to the N-RNA template and binds the soluble protein N, preventing it from encapsidating non-genomic RNA. Also inhibits host IFN-alpha and IFN-beta signaling by binding and retaining phosphorylated STAT1 in the cytoplasm or by inhibiting the DNA binding of STAT1 in the nucleus.Might be involved, through interaction with host dynein, in intracellular microtubule-dependent virus transport of incoming virus from the synapse toward the cell body
Product Categories/Family for anti-P antibody	Total protein Ab
