

Human APO-1 ELISA Kit | APO-1 elisa kit

Human APO-1 ELISA KIT

CATALOG #
AAA309867

REACTIVITY
Human

PRODUCT SYNONYMS

APO-1; Human APO-1 ELISA KIT; Human APO-1; APO-1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Natural and recombinant Human APO-1
Assay Type	Solid Phase Sandwich ELISA
Samples	Cell culture supernatant, Serum, Plasma (EDTA, citrate, heparin)
Detection Range	62.5-4000pg/mL
Sensitivity	31pg/mL
Sample Volume	20 uL
Detection Method	Colorimetric
Preparation and Storage	Store at 4 degree C

IMAGES

Standard Curve (Sample)

Representative standard curve for APO-1/FAS ELISA. APO-1/FAS was diluted in serial two-fold steps in Sample Diluent.

ADDITIONAL INFORMATION

Related Product Information for APO-1 elisa kit

Apoptosis inducing protein 1 (Apo-1) also known as Fas (Fibroblast-associated), CD95, and TNFRSF6 (325 amino acids, 45-48 kDa), was originally identified as a cell-surface protein that binds to monoclonal antibodies that are cytolytic for various human cell lines. Fas is expressed by a broad range of hematopoietic and non-hematopoietic cells including monocytes, neutrophils, activated lymphocytes and fibroblasts. Interaction of Apo on mature lymphocytes with its ligand (FasL) induces apoptosis and is thought to be important in peripheral tolerance. Fas-mediated death occurs much more rapidly than that triggered by TNFR1 (Tumor necrosis factor receptor 1).

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
