

Rabbit KCNJ3 Polyclonal Antibody | anti-KCNJ3 antibody

KCNJ3 Polyclonal Antibody

CATALOG # AAA311120	HOST Rabbit	REACTIVITY Human, Mouse, Rat	APPLICATIONS Western Blot
-------------------------------	-----------------------	--	-------------------------------------

PRODUCT SYNONYMS

KCNJ3; Polyclonal Antibody; KCNJ3 Polyclonal Antibody; GIRK1; KGA; KIR3.1; potassium voltage-gated channel subfamily J member 3; anti-KCNJ3 antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Isotype	IgG
Purity/Purification	Affinity purification
Form/Format	PBS with 50% glycerol, pH7.4
Applicable Applications for anti-KCNJ3 antibody	WB (Western Blot)
Immunogen	A synthetic peptide of human KCNJ3 (NP_002230.1).
Conjugation	Unconjugated
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.

IMAGES

WB (Western Blot)

Western blot analysis of extracts of mouse brain, using KCNJ3 antibody.

WB (Western Blot)

Western blot analysis of extracts of MCF7 cells, using KCNJ3 antibody.

ADDITIONAL INFORMATION

Related Product Information for anti-KCNJ3 antibody	Potassium channels are present in most mammalian cells, where they participate in a wide range of physiologic responses. The protein encoded by this gene is an integral membrane protein and inward-rectifier type potassium channel. The encoded protein, which has a greater tendency to allow potassium to flow into a cell rather than out of a cell, is controlled by G-proteins and plays an important role in regulating heartbeat. It associates with three other G-protein-activated potassium channels to form a heteromultimeric pore-forming complex that also couples to neurotransmitter receptors in the brain and whereby channel activation can inhibit action potential firing by hyperpolarizing the plasma membrane. These multimeric G-protein-gated inwardly-rectifying potassium (GIRK) channels may play a role in the pathophysiology of epilepsy, addiction, Down's syndrome, ataxia, and Parkinson's disease. Alternative splicing results in multiple transcript variants encoding distinct proteins.
Product Categories/Family for anti-KCNJ3 antibody	Total protein Ab

NCBI AND UNIPROT INFORMATION

NCBI GI #	4504839
NCBI GeneID	3760
NCBI Accession #	NP_002230.1
NCBI GenBank Nucleotide #	NM_002239.3
UniProt Accession #	P48549; Q8TBI0; B4DEW7
Molecular Weight	26,829 Da
NCBI Official Full Name	G protein-activated inward rectifier potassium channel 1 isoform 1
NCBI Official Synonym Full Names	potassium voltage-gated channel subfamily J member 3
NCBI Official Symbol	KCNJ3
NCBI Official Synonym Symbols	KGA; GIRK1; KIR3.1
NCBI Protein Information	G protein-activated inward rectifier potassium channel 1
UniProt Protein Name	G protein-activated inward rectifier potassium channel 1
UniProt Gene Name	KCNJ3
UniProt Synonym Gene Names	GIRK1; GIRK-1
UniProt Entry Name	IRK3_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
