

## Rabbit GFP Polyclonal Antibody | anti-GFP antibody

GFP (FL) Antibody

| CATALOG # | HOST   | REACTIVITY        | APPLICATIONS                                          |
|-----------|--------|-------------------|-------------------------------------------------------|
| AAA311985 | Rabbit | Human, Mouse, Rat | Immunofluorescence, Immunoprecipitation, Western Blot |

### PRODUCT SYNONYMS

GFP; Polyclonal Antibody; GFP (FL) Antibody; GFP antibody; Green fluorescent protein antibody; yfp antibody; anti-GFP antibody

### PRODUCT SPECIFICATIONS

|                                               |                                                                             |
|-----------------------------------------------|-----------------------------------------------------------------------------|
| Host                                          | Rabbit                                                                      |
| Reactivity                                    | Human, Mouse, Rat                                                           |
| Clonality                                     | Polyclonal                                                                  |
| Purity/Purification                           | Immunogen affinity purified                                                 |
| Form/Format                                   | 1*TBS (pH7.4), 1% BSA, 40% Glycerol. Preservative: 0.05% Sodium Azide.      |
| Sequence Length                               | 238                                                                         |
| Applicable Applications for anti-GFP antibody | IF (Immunofluorescence), IP (Immunoprecipitation), WB (Western Blot)        |
| Immunogen                                     | Amino acids 1-238 representing full length GFP of Aequorea victoria origin. |
| Conjugation                                   | Unconjugated                                                                |
| Preparation and Storage                       | Store at -20 degree C.                                                      |

### IMAGES

**IF (Immunofluorescence)**

Fluorescence staining of methanol-fixed COS cells transfected with GFP, showing GFP-Protein localization in the cytoplasm.

**WB (Western Blot)**

Western blot analysis of GFP fusion protein expression in non-transfected COS cells (A) and COS cells transfected with GFP (B).

ADDITIONAL INFORMATION

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Related Product Information for anti-GFP antibody | The green fluorescent protein (GFP) was originally identified as a protein involved in the bioluminescence of the jellyfish Aequorea victoria. GFP cDNA produces a fluorescent product when expressed in prokaryotic cells, without the need for exogenous substrates or cofactors, making GFP a useful tool for monitoring gene expression and protein localization in vivo. Several GFP mutants have been developed, including EGFP, which fluoresce more intensely than the wildtype GFP and have shifted excitation maxima, making them useful for FACS and fluorescence microscopy as well as double-labeling applications. GFP is widely used in expression vectors as a fusion protein tag, allowing expression and monitoring of heterologous proteins fused to GFP. |
| Product Categories/Family for anti-GFP antibody   | Total protein Ab                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

NCBI AND UNIPROT INFORMATION

|                         |            |
|-------------------------|------------|
| NCBI GI #               | 1006078854 |
| Molecular Weight        | 27kDa      |
| NCBI Official Full Name | gfp        |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
