

## IgG secondary antibody

Mouse Anti-Pig IgG (H&amp;L)-AF647

| CATALOG # | HOST  | REACTIVITY | APPLICATIONS                                                                      |
|-----------|-------|------------|-----------------------------------------------------------------------------------|
| AAA312920 | Mouse | Pig        | Flow Cytometry, Functional Assay, Immunofluorescence, Immunohistochemistry, ELISA |

### PRODUCT SYNONYMS

IgG; Monoclonal Secondary Antibody; Mouse Anti-Pig IgG (H&amp;L)-AF647; IgG secondary antibody

### PRODUCT SPECIFICATIONS

|                                                    |                                                                                                                                                        |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                               | Mouse                                                                                                                                                  |
| Reactivity                                         | Pig                                                                                                                                                    |
| Clonality                                          | Monoclonal                                                                                                                                             |
| Specificity                                        | By immunoelectrophoresis and ELISA this antibody reacts specifically with Pig IgG. No antibody was detected against non immunoglobulin serum proteins. |
| Purity/Purification                                | The antibody was isolated from ascitic by immunoaffinity chromatography using antigens coupled to agarose beads.                                       |
| Form/Format                                        | Liquid in 0.01M Phosphate Buffered Saline, pH7.2, containing 1% BSA, 50% glycerol, 0.02% Sodium Azide                                                  |
| Concentration                                      | 1mg/ml (varies by lot)                                                                                                                                 |
| Applicable Applications for IgG secondary antibody | FCM/FACS (Flow Cytometry), IF (Immunofluorescence), IHC (Immunohistochemistry), ELISA                                                                  |
| Immunogen                                          | Pig IgG                                                                                                                                                |
| Conjugation                                        | AF647                                                                                                                                                  |
| Preparation and Storage                            | Aliquot and freeze and store at -20°C. Avoid freeze/thaw cycles.                                                                                       |

### ADDITIONAL INFORMATION

|                                                        |                               |
