

## Rabbit hnRNP M Polyclonal Antibody | anti-hnRNP M antibody

hnRNP M Antibody

| CATALOG # | HOST   | REACTIVITY        | APPLICATIONS                                                  |
|-----------|--------|-------------------|---------------------------------------------------------------|
| AAA317497 | Rabbit | Human, Mouse, Rat | ELISA, Immunofluorescence, Immunohistochemistry, Western Blot |

### PRODUCT SYNONYMS

hnRNP M; Polyclonal Antibody; hnRNP M Antibody; HNRPM; heterogeneous nuclear ribonucleoprotein M; anti-hnRNP M antibody

### PRODUCT SPECIFICATIONS

|                                                   |                                                                                                                                                    |
|---------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Host                                              | Rabbit                                                                                                                                             |
| Reactivity                                        | Human, Mouse, Rat                                                                                                                                  |
| Clonality                                         | Polyclonal                                                                                                                                         |
| Specificity                                       | hnRNP M Antibody detects endogenous levels of total hnRNP M protein.                                                                               |
| Purity/Purification                               | Purified from rabbit antiserum by affinity-chromatography using immunogen.                                                                         |
| Form/Format                                       | Rabbit IgG in phosphate buffered saline (without Mg <sup>2+</sup> and Ca <sup>2+</sup> ), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. |
| Concentration                                     | 1 mg/ml (varies by lot)                                                                                                                            |
| Sequence Length                                   | â€”                                                                                                                                                |
| Applicable Applications for anti-hnRNP M antibody | ELISA, IF (Immunofluorescence), IHC (Immunohistochemistry), WB (Western Blot)                                                                      |
| Target Modification                               | Unmodified/Total                                                                                                                                   |
| Immunogen                                         | The antiserum was produced against synthesized peptide derived from human hnRNP M.                                                                 |
| Immunogen Range                                   | Nov-60                                                                                                                                             |
| Preparation and Storage                           | Stable at -20 degree C for at least 1 year.                                                                                                        |

### IMAGES

#### WB (Western Blot)

Western blot analysis of lysates from HT-29 cells, using hnRNP M Antibody. The lane on the right is blocked with the synthesized peptide.

#### IHC (Immunohistochemistry)

Immunohistochemistry analysis of paraffin-embedded human breast carcinoma tissue, using hnRNP M Antibody. The picture on the right is blocked with the synthesized peptide.

#### IF (Immunofluorescence)

Immunofluorescence analysis of MCF7 cells, using hnRNP M Antibody. The picture on the right is blocked with the synthesized peptide.
