

Ezrin ELISA Kit | EZR elisa kit

Ezrin (Phospho-Thr566) Phospho Sandwich ELISA Kit

CATALOG #
AAA318623

REACTIVITY
Human, Mouse, Rat

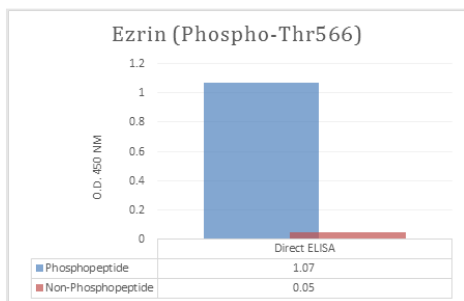

PRODUCT SYNONYMS

Ezrin; Ezrin (Phospho-Thr566) Phospho Sandwich ELISA Kit; Cytovillin; EZRI; p81; VIL2; Villin 2; EZR elisa kit

PRODUCT SPECIFICATIONS

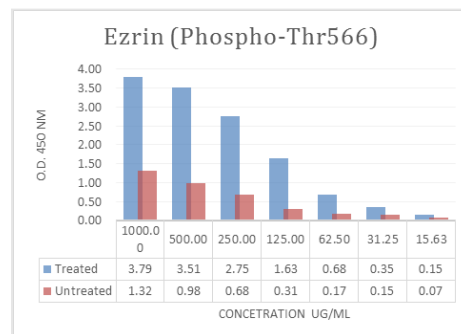

Reactivity	Human, Mouse, Rat
Specificity	The Ezrin (Phospho-Thr566) Phospho Sandwich ELISA Kit is a convenient, lysate- free, high throughput and sensitive assay kit that can detect Ezrin protein phosphorylation and expression profile in cell lysates. The kit can be used for measuring the relative amounts of phosphorylated Ezrin in cultured cells as well as screening for the effects that various treatments, inhibitors (ie. siRNA or chemicals), or activators have on Ezrin phosphorylation.
Sequence Length	586
Assay Type	Quantitative Sandwich
Preparation and Storage	Store entire kit at 4 degree C until use. Kit expiration is 3 months from date of shipment.

IMAGES

ELISA

Enzyme-Linked Immunosorbent Assay (ELISA) for immunogen phosphor-peptide (left) and non-phospho peptide (right), using Anti-Ezrin (Phospho-Thr566) Antibody.

Application Data

HeLa cells were grown to 90% confluency and stimulated with 30 ng/mL TNF-

ADDITIONAL INFORMATION

Related Product Information for EZR elisa kit	Principle of the Assay: The Phospho Sandwich Ezrin (Phospho-Thr566) ELISA Kit contains the components necessary for semi-quantitative determination of Ezrin (Phospho-Thr566) concentrations within experimental cell lysate samples. This particular immunoassay utilizes the traditional "Sandwich" Enzyme-Linked Immunosorbent Assay (ELISA) where the target protein (antigen) is bound in a "sandwich" format by the primary capture antibodies coated to each well-bottom and the secondary detection antibodies added subsequently by the investigator. The capture antibodies coated to the bottom of each well are specific for a particular epitope Ezrin (Phospho-Thr566) while the user-added detection antibodies bind to epitopes on the captured target protein. Amid each step of the procedure, a series of wash steps must be performed to ensure the elimination of non-specific binding between proteins to other proteins or to the solid phase. After incubation and "sandwiching" of the target antigen, a peroxidase enzyme is conjugated to the constant heavy chain of the secondary antibody (either covalently or via Avidin/Streptavidin-Biotin interactions), allowing for a colorimetric reaction to ensue upon substrate addition. When the substrate TMB (3, 3', 5, 5'-Tetramethylbenzidine) is added, the reaction catalyzed by peroxidase yields a blue color that is representative of the antigen concentration. Upon sufficient color development, the reaction can be terminated through addition of Stop Solution (2 N Sulfuric Acid) where the color of the solution will turn yellow. The absorbance of each well can then be read by a spectrophotometer where data analysis may begin.
Product Categories/Family for EZR elisa kit	Phospho Sandwich ELISA

NCBI AND UNIPROT INFORMATION

NCBI GI #	161702986
NCBI GeneID	7430
NCBI Accession #	NP_001104547.1
NCBI GenBank Nucleotide #	NP_001104547.1
UniProt Accession #	P15311
NCBI Official Full Name	ezrin
NCBI Official Synonym Full Names	ezrin
NCBI Official Symbol	EZR
NCBI Official Synonym Symbols	CVL; CVIL; VIL2; HEL-S-105
NCBI Protein Information	ezrin
UniProt Protein Name	Ezrin
UniProt Gene Name	EZR
UniProt Synonym Gene Names	VIL2
UniProt Entry Name	EZRI_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
