

## Rabbit IL-17D Polyclonal Antibody | anti-IL-17D antibody

IL-17D Rabbit Polyclonal Antibody

| CATALOG # | HOST   | REACTIVITY        | APPLICATIONS                                    |
|-----------|--------|-------------------|-------------------------------------------------|
| AAA318856 | Rabbit | Human, Rat, Mouse | ELISA, Immunofluorescence, Immunohistochemistry |

### PRODUCT SYNONYMS

IL-17D; Polyclonal Antibody; IL-17D Rabbit Polyclonal Antibody; Interleukin-17D (IL-17D)(Interleukin-27)(IL-27); BH6842; anti-IL-17D antibody

### PRODUCT SPECIFICATIONS

|                                                  |                                                                                                                       |
|--------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Host                                             | Rabbit                                                                                                                |
| Reactivity                                       | Human, Rat, Mouse                                                                                                     |
| Clonality                                        | Polyclonal                                                                                                            |
| Specificity                                      | The antibody detects endogenous IL-17D                                                                                |
| Purity/Purification                              | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. |
| Form/Format                                      | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.                                               |
| Concentration                                    | 1mg/ml (varies by lot)                                                                                                |
| Applicable Applications for anti-IL-17D antibody | ELISA, IF (Immunofluorescence), IHC (Immunohistochemistry)                                                            |
| Immunogen                                        | Synthetic peptide from human protein at AA range: 141-190                                                             |
| Modification                                     | Unmodified/Total                                                                                                      |
| Preparation and Storage                          | Store at -20 degree C/1 year                                                                                          |

### IMAGES

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human-tonsil, antibody was diluted at 1:100

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human-tonsil, antibody was diluted at 1:100

**IHC (Immunohistochemistry)**

Immunohistochemical analysis of paraffin-embedded Human-brain, antibody was diluted at 1:100

**ADDITIONAL INFORMATION**

|                                                             |                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Related Product Information for anti-IL-17D antibody</b> | The protein encoded by this gene is a cytokine that shares the sequence similarity with IL17. The treatment of endothelial cells with this cytokine has been shown to stimulate the production of other cytokines including IL6, IL8 and CSF2/GM-CSF. The increased expression of IL8 induced by this cytokine was found to be NF-kappa B-dependent. [provided by RefSeq, Jul 2008] |
