

Rabbit FSHR Polyclonal Antibody | anti-FSHR antibody

FSHR Antibody

CATALOG #	HOST	REACTIVITY	APPLICATIONS
AAA326193	Rabbit	Human, Mouse, Rat	ELISA, Immunocytochemistry, Immunofluorescence, Immunohistochemistry, Western Blot

PRODUCT SYNONYMS

FSHR; Polyclonal Antibody; FSHR Antibody; Follicle stimulating hormone receptor; Follicle stimulating hormone receptor isoform 1; Follicle-stimulating hormone receptor; Follitropin receptor; FSH receptor; FSH-R; Fshr; FSHR_HUMAN; FSHRO; LGR1; MGC141667; MGC141668; ODG1; ovarian dysgenesis 1; anti-FSHR antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Isotype	IgG
Specificity	FSHR antibody detects endogenous levels of total FSHR
Purity/Purification	The antiserum was purified by peptide affinity chromatography using SulfoLink Coupling Resin.
Form/Format	Liquid Phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Concentration	1mg/ml (varies by lot)
Sequence Length	695
Applicable Applications for anti-FSHR antibody	ELISA, ICC (Immunocytochemistry), IF (Immunofluorescence), IHC (Immunohistochemistry), WB (Western Blot)
Immunogen	A synthesized peptide derived from human FSHR
Subcellular Location	Cell Membrane
Tissue Specificity	Sertoli cells and ovarian granulosa cells.
Conjugation	Unconjugated
Preparation and Storage	Store at -20 degree C. Stable for 12 months from date of receipt.

IMAGES

IF (Immunofluorescence)

AAA326193 staining HUVEC by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100, then blocked in 10% serum for 45 minutes at 25 degree C. The primary antibody was diluted at 1/200 and incubated with the sample for 1 hour at 37 degree C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary antibody.

WB (Western Blot)

Western blot analysis of Huvec whole cell lysates, using FSHR Antibody. The lane on the left is treated with the antigen-specific peptide.

IHC (Immunohistochemistry)

AAA326193 at 1/100 staining Human liver cancer tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the antibody for 1.5 hours at 22 degree C. An HRP conjugated goat anti-rabbit antibody was used as the secondary.

ADDITIONAL INFORMATION

Related Product Information for anti-FSHR antibody	Description: FSHR, also named as LGR1, belongs to the G-protein coupled receptor 1 family and FSH/LSH/TSH subfamily. FSHR is a receptor for follicle-stimulating hormone. The activity of this receptor is mediated by G proteins which activate adenylate cyclase. Defects in FSHR are a cause of ovarian dysgenesis type 1 (ODG1). Defects in FSHR are a cause of ovarian hyperstimulation syndrome (OHSS). The antibody is special to FSHR. Function: Receptor for follicle-stimulating hormone or follitropin (PubMed:11847099, PubMed:24058690). The activity of this receptor is mediated by G proteins which activate adenylate cyclase (PubMed:11847099). Induces cAMP production through the activation of PI3K-AKT and SRC-ERK1/2 signaling pathways (PubMed:24058690). Subunit Structure: Interacts with ARRB2. Post-translational Modifications: Sulfated. N-glycosylated; indirectly required for FSH-binding, possibly via a conformational change that allows high affinity binding of hormone. Similarity: Belongs to the G-protein coupled receptor 1 family. FSH/LSH/TSH subfamily.
