

Human 14-3-3 Protein zeta/delta (YWHAZ) ELISA Kit | YWHAZ elisa kit

Human 14-3-3 Protein zeta/delta (YWHAZ) ELISA Kit

CATALOG #
AAA330238

REACTIVITY
Human

PRODUCT SYNONYMS

14-3-3 Protein zeta/delta (YWHAZ); Human 14-3-3 Protein zeta/delta (YWHAZ) ELISA Kit; YWHAZ; 14-3-3-zeta; KCIP-1; MGC111427; MGC126532; MGC138156; 14-3-3 protein/cytosolic phospholipase A2; 14-3-3 zeta; OTTHUMP00000165851; OTTHUMP00000165858; phospholipase A2; protein kinase C inhibitor protein-; YWHAZ elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Human 14-3-3 protein zeta/delta (YWHAZ) ELISA Kit has high sensitivity and excellent specificity for detection of Human YWHAZ. No significant cross-reactivity or interference between Human YWHAZ and analogues was observed.
Sequence Length	245
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for YWHAZ elisa kit	Description: This Human 14-3-3 protein zeta/delta (YWHAZ) ELISA Kit employs a two-site sandwich ELISA to quantitate YWHAZ in samples. An antibody specific for YWHAZ has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any YWHAZ present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for YWHAZ is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of YWHAZ bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: YWHAz belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 99% identical to the mouse, rat and sheep orthologs. The deduced 245-amino acid protein shares high sequence homology with other 14-3-3 subtypes. The zeta mRNA was widely expressed in various gray matter brain regions, including the neocortex, hippocampus, caudate-putamen, thalamus, cerebellar cortex, and several brain stem nuclei. A human protein with phospholipase A2 activity was shown to be the zeta subtype of the 14-3-3 protein

NCBI AND UNIPROT INFORMATION

NCBI GI #	208973238
NCBI GeneID	7534
NCBI Accession #	NP_001129171.1
NCBI GenBank Nucleotide #	NP_001129171.1
UniProt Accession #	P63104
NCBI Official Full Name	14-3-3 protein zeta/delta
NCBI Official Synonym Full Names	tyrosine 3-monooxygenase/tryptophan 5-monooxygenase activation protein zeta
NCBI Official Symbol	YWHAZ
NCBI Official Synonym Symbols	HEL4; YWHAD; KCIP-1; HEL-S-3; POPCHAS; HEL-S-93; 14-3-3-zeta
NCBI Protein Information	14-3-3 protein zeta/delta
UniProt Protein Name	14-3-3 protein zeta/delta
UniProt Gene Name	YWHAZ
UniProt Synonym Gene Names	KCIP-1
UniProt Entry Name	1433Z_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
