

Human Trace Amine-Associated Receptor 9 (TAAR9) ELISA Kit | TAAR9 elisa kit

Human Trace Amine-Associated Receptor 9 (TAAR9) ELISA Kit

CATALOG #
AAA330672

REACTIVITY
Human

PRODUCT SYNONYMS

Trace Amine-Associated Receptor 9 (TAAR9); Human Trace Amine-Associated Receptor 9 (TAAR9) ELISA Kit; TAAR9; TA3; TAR3; TRAR3; trace amine receptor 3; TAAR9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Human Trace amine-associated receptor 9 (TAAR9) ELISA Kit has high sensitivity and excellent specificity for detection of Human TAAR9. No significant cross-reactivity or interference between Human TAAR9 and analogues was observed.
Sequence Length	348
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TAAR9 elisa kit	Description: This Human Trace amine-associated receptor 9 (TAAR9) ELISA Kit employs a two-site sandwich ELISA to quantitate TAAR9 in samples. An antibody specific for TAAR9 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TAAR9 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TAAR9 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TAAR9 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: TAAR9 is a member of a large family of rhodopsin G protein-coupled receptors (GPCRs, or GPRs). GPCRs contain 7 transmembrane domains and transduce extracellular signals through heterotrimeric G proteins

NCBI AND UNIPROT INFORMATION

NCBI GI #	110618256
NCBI GeneID	134860
NCBI Accession #	NP_778227.3
NCBI GenBank Nucleotide #	NP_778227.3
UniProt Accession #	Q96RI9
NCBI Official Full Name	trace amine-associated receptor 9
NCBI Official Synonym Full Names	trace amine associated receptor 9 (gene/pseudogene)
NCBI Official Symbol	TAAR9
NCBI Official Synonym Symbols	TA3; TAR3; TAR9; TRAR3
NCBI Protein Information	trace amine-associated receptor 9
UniProt Protein Name	Trace amine-associated receptor 9
UniProt Gene Name	TAAR9
UniProt Synonym Gene Names	TA3; TAR3; TRAR3; TaR-9; Trace amine receptor 9; TaR-3
UniProt Entry Name	TAAR9_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
