

## Human Taste Receptor Type 2 Member 39 (TAS2R39) ELISA Kit | TAS2R39 elisa kit

Human Taste Receptor Type 2 Member 39 (TAS2R39) ELISA Kit

CATALOG #  
**AAA330711**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Taste Receptor Type 2 Member 39 (TAS2R39); Human Taste Receptor Type 2 Member 39 (TAS2R39) ELISA Kit; TAS2R39 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Specificity             | Human Taste receptor type 2 member 39 (TAS2R39) ELISA Kit has high sensitivity and excellent specificity for detection of Human TAS2R39. No significant cross-reactivity or interference between Human TAS2R39 and analogues was observed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Sequence Length         | 338                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Detection Method        | Colorimetric                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Usage Notes             | <ul style="list-style-type: none"> <li>* Do not mix components from different kit lots or use reagents beyond the kit expiration date.</li> <li>* Allow all reagents to warm to room temperature for at least 30 minutes before opening.</li> <li>* Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination.</li> <li>* Unused wells must be kept desiccated at 4 degree C in the sealed bag provided.</li> <li>* Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes.</li> <li>* It is recommended that all samples and standards be assayed in duplicate or triplicate.</li> </ul> |
| Preparation and Storage | Store at 2-8 degree C.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Related Product Information for TAS2R39 elisa kit | <p>Description: This Human Taste receptor type 2 member 39 (TAS2R39) ELISA Kit employs a two-site sandwich ELISA to quantitate TAS2R39 in samples. An antibody specific for TAS2R39 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TAS2R39 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TAS2R39 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TAS2R39 bound in the initial step. The color development is stopped and the intensity of the color is measured.</p> <p>Background: Taste receptor type 2 member 39 (TAS2R39) is a bitter taste receptor that detects green tea catechins, soy isoflavones, and theaflavins. TAS2R39 is gustducin-linked and may activate alpha gustducin. TAS2R39 is intronless</p> |

| UniProt Protein Name             | Taste receptor type 2 member 39 |
| UniProt Gene Name                | TAS2R39                         |
| UniProt Synonym Gene Names       | T2R39; T2R57                    |
| UniProt Entry Name               | T2R39_HUMAN                     |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
