

Human Mucin-15 (MUC15) ELISA Kit | MUC15 elisa kit

Human Mucin-15 (MUC15) ELISA Kit

CATALOG #
AAA331624

REACTIVITY
Human

PRODUCT SYNONYMS

Mucin-15 (MUC15); Human Mucin-15 (MUC15) ELISA Kit; MUC15; PAS3; PASIII; mucin 15; MUC15 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Human Mucin-15 (MUC15) ELISA Kit has high sensitivity and excellent specificity for detection of Human MUC15. No significant cross-reactivity or interference between Human MUC15 and analogues was observed.
Sequence Length	361
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MUC15 elisa kit	Description: This Human Mucin-15 (MUC15) ELISA Kit employs a two-site sandwich ELISA to quantitate MUC15 in samples. An antibody specific for MUC15 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MUC15 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MUC15 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MUC15 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: MUC15 (Mucin 15, Cell Surface Associated) is a Protein Coding gene. Diseases associated with MUC15 include Immune System Disease. Among its related pathways are Immune System and HIV Life Cycle. May play a role in the cell adhesion to the extracellular matrix.

NCBI AND UNIPROT INFORMATION

NCBI GI #	205360923
NCBI GeneID	143662
NCBI Accession #	NP_001128563.1
NCBI GenBank Nucleotide #	NP_001128563.1
UniProt Accession #	Q8N387
NCBI Official Full Name	mucin-15 isoform a
NCBI Official Synonym Full Names	mucin 15, cell surface associated
NCBI Official Symbol	MUC15
NCBI Official Synonym Symbols	PAS3; MUC-15; PASIII
NCBI Protein Information	mucin-15
UniProt Protein Name	Mucin-15
UniProt Gene Name	MUC15
UniProt Synonym Gene Names	MUC-15
UniProt Entry Name	MUC15_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
