

Human Matrix Metalloproteinase-24 (MMP24) ELISA Kit | MMP24 elisa kit

Human Matrix Metalloproteinase-24 (MMP24) ELISA Kit

CATALOG #
AAA331746

REACTIVITY
Human

PRODUCT SYNONYMS

Matrix Metalloproteinase-24 (MMP24); Human Matrix Metalloproteinase-24 (MMP24) ELISA Kit; MMP24; RP4-614O4.10; MMP25; MT-MMP5; MT5-MMP; matrix metalloproteinase 24; matrix metalloproteinase 24 (membrane-inserted); membrane-type 5 matrix metalloproteinase; MMP24 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Human Matrix metalloproteinase-24 (MMP24) ELISA Kit has high sensitivity and excellent specificity for detection of Human MMP24. No significant cross-reactivity or interference between Human MMP24 and analogues was observed.
Sequence Length	645
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MMP24 elisa kit	Description: This Human Matrix metalloproteinase-24 (MMP24) ELISA Kit employs a two-site sandwich ELISA to quantitate MMP24 in samples. An antibody specific for MMP24 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any MMP24 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for MMP24 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of MMP24 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: MMP24 encodes a member of the peptidase M10 family of matrix metalloproteinases (MMPs). Proteins in this family are involved in the breakdown of extracellular matrix in normal physiological processes, such as embryonic development, reproduction, and tissue remodeling, as well as in disease processes, such as arthritis and metastasis. The encoded preproprotein is proteolytically processed to generate the mature protease. Unlike most MMPs, which are secreted, this protease is a member of the membrane-type MMP (MT-MMP) subfamily, contains a transmembrane domain and is expressed at the cell surface. Substrates of this protease include the proteins cadherin 2 and matrix metalloproteinase 2 (also known as 72 kDa type IV collagenase).

NCBI AND UNIPROT INFORMATION

NCBI GI #	12585280
NCBI GeneID	10893
UniProt Accession #	Q9Y5R2
NCBI Official Full Name	Matrix metalloproteinase-24
NCBI Official Synonym Full Names	matrix metalloproteinase 24
NCBI Official Symbol	MMP24
NCBI Official Synonym Symbols	MMP25; MMP-24; MT5MMP; MTMMP5; MT-MMP5; MT5-MMP; MT-MMP 5
NCBI Protein Information	matrix metalloproteinase-24
UniProt Protein Name	Matrix metalloproteinase-24
UniProt Gene Name	MMP24
UniProt Synonym Gene Names	MT5MMP; MMP-24; MT-MMP 5; MTMMP5; MT5-MMP; MT5MMP
UniProt Entry Name	MMP24_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
