

Mouse Tankyrase-2 (TNKS2) ELISA Kit | TNKS2 elisa kit

Mouse Tankyrase-2 (TNKS2) ELISA Kit

CATALOG #
AAA332119

REACTIVITY
Mouse

PRODUCT SYNONYMS

Tankyrase-2 (TNKS2); Mouse Tankyrase-2 (TNKS2) ELISA Kit; TNKS2; PARP-5b; PARP-5c; PARP5B; PARP5C; TANK2; TNKL; tankyrase 2; TNKS2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Mouse Tankyrase-2 (TNKS2) ELISA Kit has high sensitivity and excellent specificity for detection of Mouse TNKS2. No significant cross-reactivity or interference between Mouse TNKS2 and analogues was observed.
Sequence Length	1166
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TNKS2 elisa kit	Description: This Mouse Tankyrase-2 (TNKS2) ELISA Kit employs a two-site sandwich ELISA to quantitate TNKS2 in samples. An antibody specific for TNKS2 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TNKS2 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TNKS2 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TNKS2 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: The poly(ADP-ribose) polymerase (PARP) tankyrase-1 contains an ankyrin-repeat domain that binds to various partners, including the telomeric protein TRF1 (telomere-repeat-binding factor 1) and the vesicular protein IRAP (insulin-responsive aminopeptidase). TRF1 binding recruits tankyrase-1 to telomeres and allows its PARP activity to regulate telomere homeostasis. By contrast, IRAP binding and the Golgi co-localization of tankyrase-1 with IRAP might allow tankyrase-1 to affect the targeting of IRAP-containing vesicles. A closely related protein, tankyrase-2, has also been implicated in vesicular targeting. Unlike tankyrase-1, tankyrase-2 has not been shown to have PARP activity. In addition, it has not been implicated in telomere homeostasis, because it did not interact with TRF1 in previous studies.

NCBI AND UNIPROT INFORMATION

NCBI GI #	254750660
NCBI GeneID	74493
NCBI Accession #	NP_001157107.1
NCBI GenBank Nucleotide #	NP_001157107.1
UniProt Accession #	Q3UES3
NCBI Official Full Name	poly
NCBI Official Synonym Full Names	tankyrase, TRF1-interacting ankyrin-related ADP-ribose polymerase 2
NCBI Official Symbol	Tnks2
NCBI Official Synonym Symbols	ARTD6; Tank2; TNKS-2; AA517131; AI662480; 5430432P15Rik
NCBI Protein Information	poly [ADP-ribose] polymerase tankyrase-2; tankyrase-2
UniProt Protein Name	Tankyrase-2
UniProt Gene Name	Tnks2
UniProt Synonym Gene Names	Tank2; TANK2; ARTD6
UniProt Entry Name	TNKS2_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
