

Mouse Antigen Peptide Transporter 1 (TAP1) ELISA Kit | TAP1 elisa kit

Mouse Antigen Peptide Transporter 1 (TAP1) ELISA Kit

CATALOG #
AAA332350

REACTIVITY
Mouse

PRODUCT SYNONYMS

Antigen Peptide Transporter 1 (TAP1); Mouse Antigen Peptide Transporter 1 (TAP1) ELISA Kit; TAP1; DAAP-57C1.5; ABC17; ABCB2; APT1; D6S114E; FLJ26666; FLJ41500; PSF1; RING4; TAP1*0102N; TAP1N; ABC transporter; MHC 1; ATP-binding cassette; sub-family B (MDR/TAP); member 2; antigen peptide transporter; TAP1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	Mouse Antigen peptide transporter 1 (TAP1) ELISA Kit has high sensitivity and excellent specificity for detection of Mouse TAP1. No significant cross-reactivity or interference between Mouse TAP1 and analogues was observed.
Sequence Length	724
Assay Type	Sandwich ELISA (Quantitative)
Samples	Cell Culture Supernatants, Serum, Plasma, Other Biological Fluids
Detection Method	Colorimetric
Usage Notes	* Do not mix components from different kit lots or use reagents beyond the kit expiration date. * Allow all reagents to warm to room temperature for at least 30 minutes before opening. * Pre-rinse the pipet tip with reagent, use fresh pipet tips for each sample, standard and reagent to avoid contamination. * Unused wells must be kept desiccated at 4 degree C in the sealed bag provided. * Mix Thoroughly is very important for the result. It is recommended using low frequency oscillator or slight hand shaking every 10 minutes. * It is recommended that all samples and standards be assayed in duplicate or triplicate.
Preparation and Storage	Store at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TAP1 elisa kit	Description: This Mouse Antigen peptide transporter 1 (TAP1) ELISA Kit employs a two-site sandwich ELISA to quantitate TAP1 in samples. An antibody specific for TAP1 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TAP1 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TAP1 is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TAP1 bound in the initial step. The color development is stopped and the intensity of the color is measured. Background: The membrane-associated protein encoded by Tap1 is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance. This protein forms a heterodimer with Tap2 that transports short peptides from the cytosol into the endoplasmic reticulum lumen. Mutations in the human gene may be associated with ankylosing spondylitis, insulin-dependent diabetes mellitus, and celiac disease. Two transcript variants encoding different isoforms have been found for Tap1.

NCBI AND UNIPROT INFORMATION

NCBI GI #	239835765
NCBI GeneID	21354
NCBI Accession #	NP_038711.2
NCBI GenBank Nucleotide #	NP_038711.2
UniProt Accession #	P21958
NCBI Official Full Name	antigen peptide transporter 1 isoform 1
NCBI Official Synonym Full Names	transporter 1, ATP-binding cassette, sub-family B (MDR/TAP)
NCBI Official Symbol	Tap1
NCBI Official Synonym Symbols	Y3; TAP; APT1; Ham1; MTP1; PSF1; ABC17; Abcb2; Ham-1; RING4; Tap-1
NCBI Protein Information	antigen peptide transporter 1
UniProt Protein Name	Antigen peptide transporter 1
UniProt Gene Name	Tap1
UniProt Synonym Gene Names	Abcb2; Ham-1; Ham1; APT1
UniProt Entry Name	TAP1_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
