

Mouse anti-Human RERE Monoclonal Antibody | anti-RERE antibody

Mouse monoclonal antibody Anti-Human RERE

CATALOG # AAA36349	HOST Mouse	REACTIVITY Human	APPLICATIONS Dot Blot
------------------------------	----------------------	----------------------------	---------------------------------

PRODUCT SYNONYMS

RERE; Monoclonal Antibody; Mouse monoclonal antibody Anti-Human RERE; Homo sapiens arginine-glutamic acid dipeptide (RE) repeats; mRNA (cDNA clone MGC:71168 IMAGE:6379220); complete cds; PID; MTA1L1; DKFZp686F2281; anti-RERE antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Isotype	IgG2b
Clone Number	REREF1H8
Concentration	100 ug/ml (1.0 ml) (varies by lot)
Sequence Length	5497
Applicable Applications for anti-RERE antibody	DB (Dot Blot)
Preparation	This antibody was purified using protein G column chromatography from culture supernatant of hybridoma cultured in a medium containing bovine IgG-depleted (approximately 95%) fetal bovine serum.
Sterility	Filtered through a 0.22 um membrane.

IMAGES

Quality Control #2

Arrow indicates the region of immunized recombinant protein carrying 50-200 amino acids.

Quality Control

Western blot analysis of immunized recombinant protein, using anti-RERE monoclonal antibody.

ADDITIONAL INFORMATION

Related Product Information for anti-RERE antibody	This gene encodes a member of the atrophin family of arginine-glutamic acid (RE) dipeptide repeat-containing proteins. The encoded protein co-localizes with a transcription factor in the nucleus, and its overexpression triggers apoptosis. A similar protein in mouse associates with histone deacetylase and is thought to function as a transcriptional co-repressor during embryonic development. Multiple transcript variants encoding different isoforms have been found for this gene. [NCBI Entrez Gene Summary]
