| Clonality                                        | Polyclonal                                                                                                          |
| Isotype                                          | IgG                                                                                                                 |
| Purity/Purification                              | Affinity Purification                                                                                               |
| Form/Format                                      | PBS with 0.05% proclin300,50% glycerol,pH7.3.                                                                       |
| Sequence Length                                  | 943                                                                                                                 |
| Applicable Applications for anti-NFATC1 antibody | IF (Immunofluorescence), IHC (Immunohistochemistry), WB (Western Blot)                                              |
| Immunogen                                        | Recombinant fusion protein containing a sequence corresponding to amino acids 20-300 of human NFATC1 (NP_765978.1). |
| Calculated MW                                    | 38 kDa/74kDa-88kDa/100-101kDa                                                                                       |
| Observed MW                                      | 80kDa                                                                                                               |
| Preparation and Storage                          | Store at -20°C. Avoid freeze/thaw cycles.                                                                           |

| Related Product Information for anti-NFATC1 antibody | The NFAT (nuclear factor of activated T cells) family of proteins consists of NFAT1 (NFATc2 or NFATp), NFAT2 (NFATc1 or NFATc), NFAT3 (NFATc4), and NFAT4 (NFATc3 or NFATx). All members of this family are transcription factors with a Rel homology domain and regulate gene transcription in concert with AP-1 (Jun/Fos) to orchestrate an effective immune response (1,2). NFAT proteins are predominantly expressed in cells of the immune system, but are also expressed in skeletal muscle, keratinocytes, and adipocytes, regulating cell differentiation programs in these cells (3). In resting cells, NFAT proteins are heavily phosphorylated and localized in the cytoplasm. Increased intracellular calcium concentrations activate the calcium/calmodulin-dependent serine phosphatase calcineurin, which dephosphorylates NFAT proteins, resulting in their subsequent translocation to the nucleus (2). Termination of NFAT signaling occurs upon declining calcium concentrations and phosphorylation of NFAT by kinases such as GSK-3 or CK1 (3,4). Cyclosporin A and FK506 are immunosuppressive drugs that inhibit calcineurin and thus retain NFAT proteins in the cytoplasm (5). |
| Product Categories/Family for anti-NFATC1 antibody   | Polyclonal                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
