

Human Endolyn (CD164) ELISA Kit | CD164 elisa kit

Human Endolyn (CD164) ELISA Kit

CATALOG #
AAA37889

REACTIVITY
Human

PRODUCT SYNONYMS

Endolyn (CD164); Human Endolyn (CD164) ELISA Kit; CD164 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	Natural and recombinant Human CD164
Detection Range	93.8 pg/ml - 6,000 pg/ml
Sensitivity	<50 pg/ml
Intra-assay Precision	Intra-Assay Precision (Precision within an assay): Three samples of known concentration were tested on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-Assay Precision (Precision across assays): Three samples of known concentration were tested in separate assays to assess inter- assay precision.
Preparation and Storage	Store at 4 degree C for 6 months, at -20 degree C for 12 months. Avoid multiple freeze-thaw cycles. (Shipped with wet ice)

ADDITIONAL INFORMATION

Related Product Information for CD164 elisa kit	Background: Sialomucin core protein 24 also known as endolyn or CD164, is a protein that in humans is encoded by the CD164 gene. CD164 functions as a cell adhesion molecule. This gene is mapped to 6q21. The encoded protein also interacts with the C-X-C chemokine receptor type 4 and may regulate muscle development. Elevated expression of this gene has been observed in human patients with Sezary syndrome, a type of blood cancer, and a mutation in this gene may be associated with impaired hearing. Principle of the Assay: To measure Human CD164, add standards and samples to the wells, then add the biotinylated detection antibody. Wash the wells with PBS or TBS buffer, and add Avidin-Biotin-Peroxidase Complex (ABC-HRP). Wash away the unbounded ABC-HRP with PBS or TBS buffer and add TMB. TMB is an HRP substrate and will be catalyzed to produce a blue color product, which changes into yellow after adding the acidic stop solution. The absorbance of the yellow product at 450nm is linearly proportional to Human CD164 in the sample. Read the absorbance of the yellow product in each well using a plate reader, and benchmark the sample wells' readings against the standard curve to determine the concentration of Human CD164 in the sample. Intended Uses: This ELISA kit is a solid-phase immunoassay specially designed to measure Human CD164 with a 96-well strip plate that is pre-coated with antibody specific for CD164. The detection antibody is a biotinylated antibody specific for CD164. The capture antibody is A monoclonal antibody from mouse and the detection antibody is a biotinylated detection polyclonal antibody from goat. The kit includes Human CD164 protein as standards.

NCBI AND UNIPROT INFORMATION

NCBI GI #	257051036
NCBI GeneID	8763
UniProt Accession #	Q04900; O95413; Q5JSU6; Q9BPV0; Q9NR26; B4DQ85; E1P5E7; E1P5E8; E1P5E9
Molecular Weight	16,736 Da
NCBI Official Full Name	Sialomucin core protein 24
NCBI Official Synonym Full Names	CD164 molecule
NCBI Official Symbol	CD164
NCBI Official Synonym Symbols	DFNA66; MGC-24; MUC-24; MGC-24v; endolyn
NCBI Protein Information	sialomucin core protein 24
UniProt Protein Name	Sialomucin core protein 24
UniProt Gene Name	CD164
UniProt Synonym Gene Names	MUC-24; MGC-24; MGC-24v

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
